| Languages | SQL |
| Databases | Oracle 11g. |
| Test Management Tools | QC |
| Packages | MS Office /2010, Open Office. |

Education

- ✓ Bachelor degree 2021 with 78%.

Professional Experience

PROJECT #1 : **actiTIME time tracking management**
Client : **Verizon Wireless.**
Team Size : **7**
Role : **Manual Testing Engineer**
Environment : **Manual Testing, Selenium, MS Excel**

Description:

A ActiTIME is a web-based time tracking application designed to help businesses track employee working hours, manage tasks, monitor project progress, and generate reports for payroll and billing. The tool allows team members to log their work time against assigned tasks, and managers can analyze the performance through detailed reports and dashboards

Responsibilities:

- ❖ Prepared test scenario , regression and smoke, and UI testing of application
- ❖ Developed automation-test script using selenium web driver with java testNG framework.
- ❖ Used page object model design patterns to improve code Re-usability
- ❖ Handled dynamic element and multiple window/tabs using selenium
- ❖ **Logged and tracked defect in defect tool Jira.**

Responsibilities at office

- ❖ Created detailed **test scenarios** to validate the **application functionality** and have written **test cases** from the time of **client requirement gathering**.
- ❖ Helped in creating detailed **Test Plan** to drive the entire **testing process** and guide
- ❖ **Writing test cases, execution of test cases, and maintenance of test results** and generated **detailed test reports**.
- ❖ Integrated **Quality Center** with **MS-Office** and managed the entire test documentation like **Test Cases, Test Execution Results, Defect Reports and Test Status Reports**.
- ❖ Coordinated the offshore team efforts and updated the QA manager with the progress from time to time.
- ❖ **Manual testing** by writing **test plan** and **test case** for the **enhanced features**.
- ❖ Defect **Reporting** and **Tracking** .
